Project Overview: BMDb

BMDb(Bangladesh Movie Database) is an online database of information related to Bangladeshi films.

This application will provide information of entertainment to the Bangladeshi movie enthusiasts.

There will be 2 users of this system -

- User
- Admin

➤ Project Motivation

We want to make an application where all the information of the Bangladeshi movies will be available to the users.

There is no application in Bangladesh which provides a database of Bangladeshi movies. People can explore Bangladeshi movies in this application.

Any user can find movies based on rating & his preferred genre.

Key Features

Bangladesh Movie Database

- Browse Movies
- Review & Rating
- Top movies

Advance Feature(If time permits)

- Watchlist

Technologies

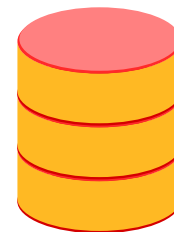

Front End

- HTML
 - CSS
 - Javascript
 - Bootstrap
-

Back End

- PHP
-

Database

- Oracle Database
-

DBMS II

Thank you!

Any suggestion would be appreciated.
